Baltimore, MD

*Food Facilities Designed by
Clevenger Frable LaVallee Inc.*

Banquet Dining

project data

Equipped Area: 24,000SF
FSE Cost: \$2,655,000
Cost/SF: \$111

situation analysis

Plans were being developed for a 757 room convention center hotel across from Oriole Park at Camden Yards. The hotel would be designed to function w/ Oriole Park and have an all weather walkway connector to the Baltimore Convention Center. The \$200 million hotel development is owned by the City and operated by Hilton Hotels.

the challenge

Design food service facilities for the hotel including banquet kitchen, three meal restaurant kitchen, room service, lobby bar, concierge lounge and employee dining facility.

solution

Relying on the Operator's design standards for space planning and equipment selection, we worked with the Architect to design efficient and cost effective food service facilities throughout the hotel.

results

The project was completed on time and on budget and in full compliance with the Operator's requirements. The project was very successful. It was completed without a single change order related to the installation of the \$2.7 MM foodservice equipment package.
