Design Services

Operational efficiency and economy are assured through careful design as well as equipment selection. We are specialists in coordinating this highly detailed process from end to end. Our design services begin at the programming phase and culminate in a formalized set of contract documents, which incorporate all design considerations and equipment specifications.

Scope of Services

- Existing conditions plans
- Space relationship/flow diagrams
- Equipment cost estimation
- Conceptual drawings
- Schematic design
- Contract documents
- Bidding/negotiation

Construction Administration Services

Successful administration of the construction phase is essential in completing a project on time and within budget. Since many project aspects must be completed in difficult construction environments, you should be certain your project is administered by experienced professionals.

Scope of Services

- Value engineering
- Contractor submittal review
- Inspection lists
- Trade interface
- Rough-in inspections
- In-shop fabrication inspections
- Installation coordination
- Progress meetings

Management Advisory Services

For a foodservice or laundry system to operate effectively and cost-efficiently, realistic objectives governing scope of work, quality and budget must be clearly defined at the project's inception.

Once these objectives have been established, a clear yet detailed action plan can be developed. This results-oriented plan must set the quality standards and cost parameters, the time frame and method of implementation.

Our Certified Public Accountants and Management Advisory Services Specialists are capable of identifying and solving most any operational or financial problem in your foodservice area.

Typically, we start with a brief review of systems and procedures fundamental to foodservice success. Should the initial findings prompt further review of accounting records, our CPA's will conduct a focused, cost effective review of potential problem areas.

Scope of Services

Operational and system analysis
Facility surveys
Feasibility studies
Cost/benefit analysis
Alternative systems analysis
Facility master planning
Foodservice/laundry program development
Request for Proposal development (operator selection)
Performance audits
Liaison management
Expert witness testimony

Accounting & Financial Management

Traditional Accounting
Audited Statements
Reviewed Statements
Compiled Statements
"Due Diligence" Reviews
Outsourced Accounting

You can rely on Clevenger Frable LaVallee in any of these service areas for your next foodservice or laundry facility project.
